

Test\_01:

- Objective: Ensuring a valid login attempt works
- Preconditions: User has already registered
- Test Steps:
  1. Username is input
  2. Password is input
  3. User clicks “Sign In” or presses enter
- Input values: Strings
- Expected result: User will be granted access and redirected to a new page

Test\_02:

- Objective: Checking if a correct username but incorrect password works
- Preconditions: User has already registered
- Test Steps:
  1. Username is input
  2. Password is input
  3. User clicks “Sign In” or presses enter
- Input values: Strings
- Expected result: User should not be granted access and an error message saying “Invalid User / Pass” pops up

Test\_03:

- Objective: Checking if a nonexistent username can log in
- Preconditions: None
- Test Steps:
  1. Username is input
  2. Password is input
  3. User clicks “Sign In” or presses enter
- Input values: Strings
- Expected result: User should not be granted access and an error message saying “Invalid User / Pass” pops up

Test\_04:

- Objective: Checking if no input will be allowed
- Preconditions: None
- Test Steps:
  1. User clicks “Sign In” or presses enter
- Input values: N/A
- Expected result: The user will be prompted to fill in any empty fields
